

Vibrational Virtue™

PRACTITIONER PROGRAM GUIDE

PRESENTED BY THE DYL METHOD™

From First Lesson to Vibrational Virtue™ Practitioner

Academic calendar, curriculum map, practice milestones,
tools, examinations, and the path into the Commission

How to use this guide

This catalog-style guide translates the live VVP practitioner roadmap into an academic-calendar format. It explains what each stage is designed to accomplish, how a trainee progresses, what the account records, and where tuition supports the program. Protected lessons, recordings, worksheets, and examinations remain inside the appropriate verified enrollment.

Program identity

Vibrational Virtue™ is The DYL Method™'s practitioner-based assessment system. Trained practitioners use structured inquiry, Physical/Vibrational Radiesthesia, independent observation, documentation, and comparative review to examine the whole person. The program is educational and practitioner-focused. It is not medical diagnosis, treatment, or licensure training.

Program at a glance

Program	Vibrational Virtue™ Practitioner Pathway
Stages	Foundational Level I, Advanced Level I, Advanced Level II, and the Commissioning Class
Instruction	60+ recorded hours across approximately four months of original Saturday and Sunday classes
Sequence	17 foundational modules; 8 Advanced Level I modules (17–24); 2 Advanced Level II modules (25–26); then live commissioning
Assessment	Examinations score from 0% to 100%; 88% or higher passes
Entry status	A paid enrollee enters as a trainee. Passing exams and completing requirements updates the practitioner record.

Reference used throughout: *Resonance is the Blueprint of Life*. It is a companion reference; protected lessons, demonstrations, assignments, and examinations remain inside trainee enrollment.

Academic calendar and progression

The program moves from learning to practice, demonstration, and professional readiness. A trainee advances when the matching course access, examination, practice, and review requirements are satisfied.

	Stage and focus	Evidence of progress
Term 1	Foundational Level I Core vocabulary, calibration, observation, energy flow, vibrational qualities, resonance, geometry, environment, centering, shape, and magnetism.	Module practice and Foundational Level I examination.
Term 2	Advanced Level I Magnetic genesis, polarization, harmonic architecture, layered fields, geometric organization, crystal tools, and field design.	Advanced practice records and Advanced Level I examination.
Term 3	Advanced Level II Specialized Melanin Pendulum™ work, harmonic calibration, tested correction, and integrated skills review.	Specialized practice and Advanced Level II examination.
Term 4	Commissioning Class Live supervised demonstrations, consent, boundaries, comparative review, and readiness assessment.	Workshop completion plus instructor and administrator review.
Ongoing	Commissioned Practitioner standing Continued practice, endorsement development, comparative review, and active standards.	Current standing and ongoing requirements.

A passing course examination at 88% or higher completes the linked certification requirement once, records the qualifying attempt, adds five hours of practice credit, and refreshes the practitioner progress record.

**STAGE 1 |**

BUILD THE FOUNDATION

Foundational Course Level I

Seventeen modules establish the vocabulary, habits, and observation skills every later stage depends on. Recorded instruction preserves 60+ hours across approximately four months of original weekend classes.

Module	What the module develops
1	Orientation and the observation foundation.
2	The language and purpose of radiesthetic inquiry.
3	Pendulum calibration and a reliable personal reference.
4	Energy flow, activation, baseline, and stable starting response.
5	Vibrational quality and quantity across color, sound, shape, minerals, plants, and bio-energy.
6	Perception as resonance and disciplined observation.
7	Testing ray qualities and distinguishing their context.
8	Vibration, proportion, rhythm, and geometric relationship.
9	Pendulum response with tone, wavelength, harmony, interference, and ratio.
10	Circulation, return, and the toroidal flow model.
11	Environmental and geopathic field influences.
12	Supportive locations, monoliths, and energetic doorways.
13	Centering, coherence, stabilization, and axis.
14	Shape, orientation, and the living language of form.
15	Self-testing with baseline, correction, documentation, and reassessment.
16	Magnetism, polarity, and organized mapping.
17	Integration, review, and the Foundational Level I examination.

Tools and materials: Foundational pendulum and calibration practice, monochord and tone exercises, ray and vibrational-quality references, geometry and shape references, environmental assessment references, centering materials, and magnetism/polarity references.

Progress gate: Complete module work and pass the examination at 88% or higher.
Pathway allocation: \$1,400.00.

**STAGE 2 | EXTEND THE FRAMEWORK**

Foundational Course: Advanced Level I

Eight modules develop orientation, harmonic architecture, layered fields, geometric organization, structured instruments, and documented field design.

Module	What the module develops
17	Magnetic genesis, organized vibration, and the living atom.
18	Magnetic north, polarization, directional reference, and the 12-band spectrum.
19	Unity, polarity, triadic centering, and Universal Centering Qualities.
20	The aura as nine nested harmonic shells.
21	The human grid and polygonal structural design.
22	Crystal form, axis, orientation, and resonance.
23	Heart-centered coherence through a seven-faced form.
24	Conscious emission, field design, and reassessment.

Tools and materials: Orientation references, polygonal structural-design references or forms, crystal tools, geometric coherence materials, and conscious-emission worksheets.

Progress gate: Pass the examination at 88% or higher. Pathway allocation: \$2,866.67.

STAGE 3 |

SPECIALIZED MASTERY

Foundational Course: Advanced Level II

Two modules focus on specialized instrument work and confirm that earlier levels can be brought together with care, consistency, and reassessment.

Module	What the module develops
25	Melanin Pendulum™ calibration, harmonic frequency, and tested correction.
26	Advanced Radiesthesia Level I skills integration and readiness review.

Tools and materials: Melanin Pendulum™ instruction, harmonic-frequency calibration references, and correction work using sound, color, shape, and image.

Progress gate: Pass the examination at 88% or higher. Pathway allocation: \$2,866.67.

COMMISSIONING AND PROFESSIONAL STANDING

Stage 4 | DEMONSTRATE READINESS

Vibrational Virtue™ Commissioning Class is the live supervised step that turns completed study into recognized practitioner readiness. It is not replaced by a passing examination alone.

- Attend the live commissioning workshop and complete demonstrations, practice, and review.
- Show work grounded in consent, independent inquiry, clear records, and appropriate boundaries.
- Complete assigned practice, assessment, review, and endorsement requirements.
- Receive instructor and administrator review before commissioning status is finalized.

Pathway allocation: \$2,000.00.

The four-stage total is \$10,000.00.

Trainee account and Endorsement Library

A paid enrollee is classified as a trainee, not automatically as a commissioned practitioner. The account connects verified course access to module completion, examinations, practice assignments, five-hour exam practice credit, instrument endorsement mastery, assessment records, and the Endorsement Library. Payment alone does not grant certification.

Ongoing standing

After commissioning, the practitioner remains part of an active framework through continued practice, assessment documentation, comparative review, instrument endorsement work, profile standing, and current entitlements.

Investment, assessment, and policies

Published pathway investment

Program Component	Allocation
Foundational Course Level I	\$1,400.00
Advanced Level I	\$3,300.00
Advanced Level II	\$3,300.00
Commissioning Class	\$2,000.00
Total pathway investment	\$10,000.00

Checkout offers display their own payment terms and remain authoritative at purchase. This allocation is the program-level planning view.

Examinations and progress

- Each course examination serves 25 questions and is scored from 0% to 100%; 22/25, or 88%, is the minimum passing score.
- Question selection and answer order are randomized; the answer key is not exposed before submission.
- The exact questions, selected answers, score, pass/fail result, and qualifying attempt are retained for authorized review.
- A passing result completes the linked requirement once, adds five practice hours, and updates the progress dial automatically.

Policies

- Digital course purchases and installment payments are final and non-refundable.
- Some recorded instruction may include strong or candid language used during the original live teaching.
- This program teaches a practitioner-based assessment framework. It does not promise medical outcomes, licensure, employment, or earnings.

Illustrative first-year view

At 12 completed clients per month, a practitioner completes 144 sessions in a year. Current fee-sheet examples range from \$18,720 gross annually for assessment-only sessions at \$130 each to \$57,600 gross annually for complete assessment plus harmonization at \$400 each. These are illustrations before processing, taxes, supplies, insurance, marketing, administrative costs, comparative-review arrangements, or cancellations. Remote delivery generally has minimal operating overhead; in-person work may be offered when appropriate but is optional.

This guide is a planning document. Current enrollment offers, verified access rules, assignment requirements, and administrative decisions control the active program.
